FREE WORKSHOP LUSELAND, SK

The Economics of Wild Oat Control

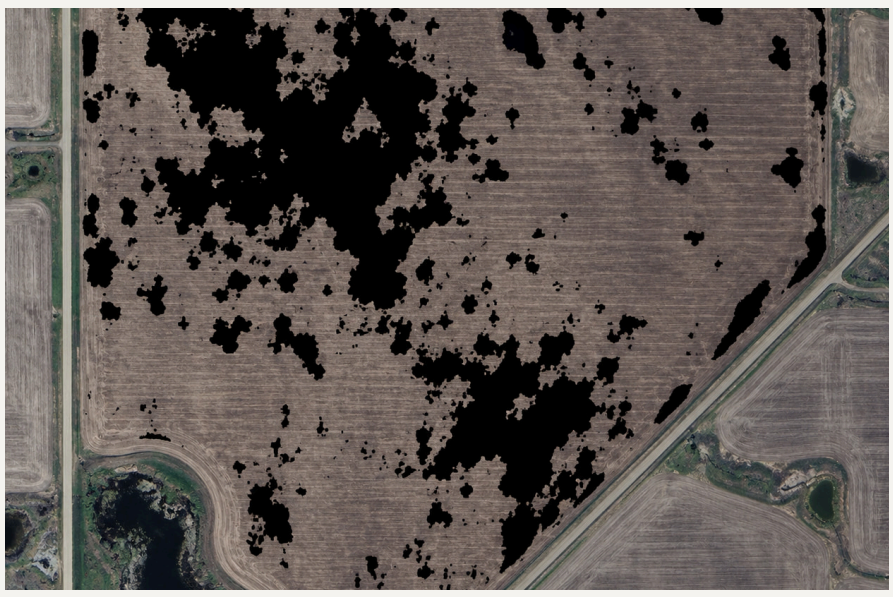

Targeted residual applications using drone maps

Would adding a residual pay on your farm?

A residual is another expense. Whether the extra control is worth it depends on your fields, and how targeting particular areas changes the math. Join us for an evening working through application costs, yield assumptions, and where drone mapping fits.

WILD OATS IDENTIFIED AMONG CANOLA SEEDLINGS

EXAMPLE OF MAPPED WILD OAT OBSERVATIONS

Thursday 5 November

7:00 pm

Luseland Credit Union Community Room
Luseland, Saskatchewan

SPEAKER

Ian Spence
NovaScout Agronomy, Luseland

ADMISSION

Free
Everyone welcome

Help shape a limited 2027 mapping program
Tell us about your wild oats, residual use, and equipment
